Established in 1964, Job Corps is the nation’s largest residential, educational, and career technical training program for at-risk young people ages 16 through 24. The 124 Job Corps centers nationwide provide an integrated, comprehensive array of services that include: academic, career technical, and life skills training; career planning and work-based learning; health care; and post-program placement and transition support.

**Advancements in Green Job Training and Sustainable Construction**

Job Corps has launched new green training programs to provide students with the skills and knowledge to compete in emerging green industries. Solar Photovoltaic (PV) and Thermal Systems, Smart Meter Technology, and Weatherization were added to Job Corps’ career technical training programs as part of the American Recovery and Reinvestment Act. Job Corps students from centers across the country, including Gary, Oneonta, Potomac, Detroit, Pittsburgh, Treasure Island, and Gainesville have already graduated and secured employment in these areas. Job Corps also launched a pilot training program in Electronic Health Record Specialist to prepare graduates for high-demand jobs in the health care industry.

Job Corps has updated facility construction and rehabilitation standards to incorporate sustainability principles and green practices. This will result in environmentally friendly construction projects, increased energy efficiency, and improved outcomes for sustainability. These construction projects also offer opportunities for students in Construction training programs to gain practical experience and contribute to green cultures overall on centers.
